

Powering a Resilient America with Critical Minerals

NYSE & TSX

TMQ

Forward-Looking Statements

This presentation includes certain "forward-looking information" and "forward-looking statements" (collectively "forward-looking statements") within the meaning of applicable Canadian and United States securities legislation including the United States Private Securities Litigation Reform Act of 1995. All statements, other than statements of historical fact, included herein, including, without limitation, the future price of copper, zinc, lead, gold and silver; the timing and amount of estimated future production; net present values and internal rates of return at Arctic and Bornite; recovery rates; payback periods; costs of production; capital expenditures; costs and timing of the development of projects; mine life; the potential options being considered regarding the next steps with the Ambler Access Project; the proposed transaction with the U.S. government and the anticipated terms thereof; the potential future development of Arctic and Bornite and the future operating or financial performance of the Company, are forward-looking statements. Forward-looking statements are frequently, but not always, identified by words such as "expects", "anticipates", "believes", "intends", "estimates", "potential", "possible", and similar expressions, or statements that events, conditions, or results "will", "may", "could", or "should" occur or be achieved. These forward-looking statements may include statements regarding perceived merit of properties and the Ambler Road; exploration plans and budgets; mineral reserves and resource estimates; work programs; capital expenditures; timelines; strategic plans; market prices for precious and base metals; statements regarding the Ambler Access Project; or other statements that are not statements of fact. Forward-looking statements involve various risks and uncertainties. There can be no assurance that such statements will prove to be accurate, and actual results and future events could differ materially from those anticipated in such statements. Important factors that could cause actual results to differ materially from the Company's expectations include: risks related to inability to define proven and probable reserves; risks related to our ability to finance the development of our mineral properties through external financing, strategic alliances, the sale of property interests or otherwise; uncertainty as to whether there will ever be production at the Company's mineral exploration and development properties; risks related to our ability to commence production and generate material revenues or obtain adequate financing for our planned exploration and development activities; risks related to lack of infrastructure including but not limited to the risk whether or not the Ambler Mining District Industrial Access Project ("AMDIAP") will receive the requisite permits and, if it does, whether the Alaska Industrial Development and Export Authority will build the AMDIAP; risks related to inclement weather which may delay or hinder exploration activities at our mineral properties; risks related to our dependence on a third party for the development of our projects; none of the Company's mineral properties are in production or are under development; risks related to future sales or issuances of equity securities decreasing the value of the Company's existing common shares, diluting voting power and reducing future earnings per share; commodity price fluctuations; our history of losses and expectation of future losses; uncertainties relating to the assumptions underlying our resource estimates, such

as metal pricing, metallurgy, mineability, marketability and operating and capital costs; uncertainty related to inferred mineral resources; mining and development risks, including risks related to infrastructure, accidents, equipment breakdowns, labor disputes or other unanticipated difficulties with or interruptions in development, construction or production; risks related to market events and general economic conditions, including changes in laws and policies regulating international trade; risks and uncertainties relating to the interpretation of drill results, the geology, grade and continuity of our mineral deposits; risks related to governmental regulation and permits, including environmental regulation, including the risk that more stringent requirements or standards may be adopted or applied due to circumstances unrelated to the Company and outside of our control; the risk that permits and governmental approvals necessary to develop and operate mines at our mineral properties will not be available on a timely basis or at all; risks related to the need for reclamation activities on our properties and uncertainty of cost estimates related thereto; uncertainty related to title to our mineral properties; risks related to the acquisition and integration of operations or projects; risks related to increases in demand for equipment, skilled labor and services needed for exploration and development of mineral properties, and related cost increases; our need to attract and retain qualified management and technical personnel; risks related to conflicts of interests of some of our directors and officers; risks related to potential future litigation; risks related to the voting power of our major shareholders and the impact that a sale by such shareholders may have on our share price; risks related to global climate change; risks related to adverse publicity from non-governmental organizations; uncertainty as to our ability to maintain the adequacy of internal control over financial reporting as per the requirements of Section 404 of the Sarbanes-Oxley Act; increased regulatory compliance costs, associated with rules and regulations promulgated by the United States Securities and Exchange Commission, Canadian Securities Administrators, the NYSE American, the Toronto Stock Exchange, and the Financial Accounting Standards Boards, and more specifically, our efforts to comply with the Dodd-Frank Wall Street Reform and Consumer Protection Act; uncertainty as to the volatility in the price of the Company's common shares; the Company's expectation of not paying cash dividends; adverse federal income tax consequences for U.S. shareholders should the Company be a passive foreign investment company; and other risks and uncertainties disclosed in the Company's Annual Report on Form 10-K or the year ended November 30, 2025 filed with Canadian securities regulatory authorities and with the United States Securities and Exchange Commission and in other Company reports and documents filed with applicable securities regulatory authorities from time to time. The Company's forward-looking statements reflect the beliefs, opinions and projections on the date the statements are made. The Company assumes no obligation to update the forward-looking statements or beliefs, opinions, projections, or other factors, should they change, except as required by law.

Richard Gosse, P.Geo., Vice President, Exploration for Trilogy, is a Qualified Person as defined by National Instrument 43-101 and under regulation S-K 1300. Mr. Gosse has reviewed the scientific and technical information in this presentation and approves the disclosure contained herein.

CAUTIONARY NOTE TO UNITED STATES INVESTORS

This presentation has been prepared in accordance with the requirements of the securities laws in effect in Canada, which differ in some respects from the requirements of U.S. securities laws. The SEC's new mining disclosure rules under Regulation S-K 1300 are closer, but not identical to NI 43-101 and CIM Definition Standards. The Company began reporting in accordance with Regulation S-K 1300 with its Form 10-K for the year ended November 30, 2022. The Mineral Resource and Mineral Reserve Estimates determined in accordance with S-K 1300 are set forth in the Appendix in addition to tables showing the Mineral Resource and Mineral Reserve Estimates determined in accordance with Canadian standards. The Bornite PEA is preliminary in nature and includes Inferred Mineral Resources that are considered too speculative geologically to have the economic considerations applied to them that would enable them to be categorized as Mineral Reserves. There is no certainty that the Bornite PEA will be realized.

NON-GAAP PERFORMANCE MEASURES

Some of the financial measures referenced in this presentation are non-GAAP performance measures. We have not reconciled forward-looking full year non-GAAP performance measures contained in this presentation to their most directly comparable GAAP

measures, as permitted by Item 10(e)(1)(i)(B) of Regulation S-K. Such reconciliations would require unreasonable efforts at this time to estimate and quantify with a reasonable degree of certainty various necessary GAAP components, including for example those related to future production costs, realized sales prices and the timing of such sales, timing and amounts of capital expenditures, metal recoveries, and corporate general and administrative amounts and timing, or others that may arise during the year. These components and other factors could materially impact the amount of the future directly comparable GAAP measures, which may differ significantly from their non-GAAP counterparts. These measures are not recognized measures under U.S. GAAP and do not have a standardized meaning prescribed by U.S. GAAP and are therefore unlikely to be comparable to similar measures presented by other companies. Rather, these measures are provided as additional information to complement those U.S. GAAP measures by providing further understanding of our results of operations from management's perspective and should not be considered in isolation or as a substitute for measures of performance prepared in accordance with U.S. GAAP. The Company believes that these measures, in addition to conventional measures prepared in accordance with U.S. GAAP, provide investors an improved ability to evaluate the underlying performance of the Company.

Addressing U.S. Supply Urgency

Why Invest in Trilogy Metals

- Long-standing, marquee shareholders with significant holdings
- Binding Letter of Intent signed in October 2025 for U.S. government to invest \$35.6M for approx. 10% interest in Trilogy
- U.S. domestic source of six critical minerals from Alaska
- Arctic Volcanogenic Massive Sulphide (VMS) Project is one of the highest-grade copper deposits in the world with an estimated average grade of about 5% copper equivalent
- Bornite Project not only hosts copper, but also cobalt and germanium
- District-scale, under-explored land package with geological potential

Ambler Mining District

	COPPER billion pounds	ZINC billion pounds	GOLD million ounces	SILVER million ounces
ARCTIC (Indicated)	2.35	3.22	0.675	52.0
ARCTIC (Inferred)	0.19	0.29	0.062	5.0
BORNITE (Inferred)	6.53	–	–	–

Developing the Upper Kobuk Mineral Projects (UKMP)¹

ARCTIC

- **Feasibility Study**
released Feb 14, 2023
- **Mineral Reserves**
46.7 Mt @ 2.11% Cu, 2.9% Zn, 0.56% Pb,
0.42 g/t Au, 31.8 g/t Ag
 - **Pre-Tax \$1.5 Billion NPV and 25.8% IRR at base case copper price of \$3.65/lb**

BORNITE

- **Preliminary Economic Assessment**
released Jan 15, 2025
- Potential for **Bornite to extend UKMP mine activity** to over 30 years
 - **Pre-Tax \$552 Million NPV and 23.6% IRR at base case copper price of \$4.20/lb**

See the Arctic Report & Bornite Report (referenced on Slide 3) and the resource and reserve tables in Appendix for additional information, including details with respect to grade, quantity and metal or mineral content. See also Technical Information and Cautionary Statements on Slide 3. The Bornite PEA is preliminary in nature and includes Inferred Mineral Resources that are considered too speculative geologically to have the economic considerations applied to them that would enable them to be categorized as Mineral Reserves. There is no certainty that the Bornite PEA will be realized.

More than a High-Grade Copper District

The Ambler Mining District is a **Source of Critical Minerals** Identified by U.S. Geological Survey (USGS)

President Trump signed the Executive Orders: **Unleashing American Energy (EO 14154)** and **Declaring a National Energy Emergency (EO 14159)**, which include policies to bolster production and processing of critical minerals.

COPPER

Used in power grid infrastructure, data centers and national defense

ZINC

Used in galvanizing steel, solar and wind power

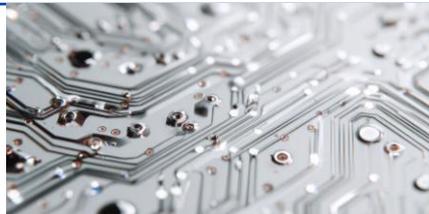

LEAD

Used in batteries, ammunition and construction

SILVER

Used in electrical circuits, solar power and medical instruments

COBALT

Used in electric vehicle batteries

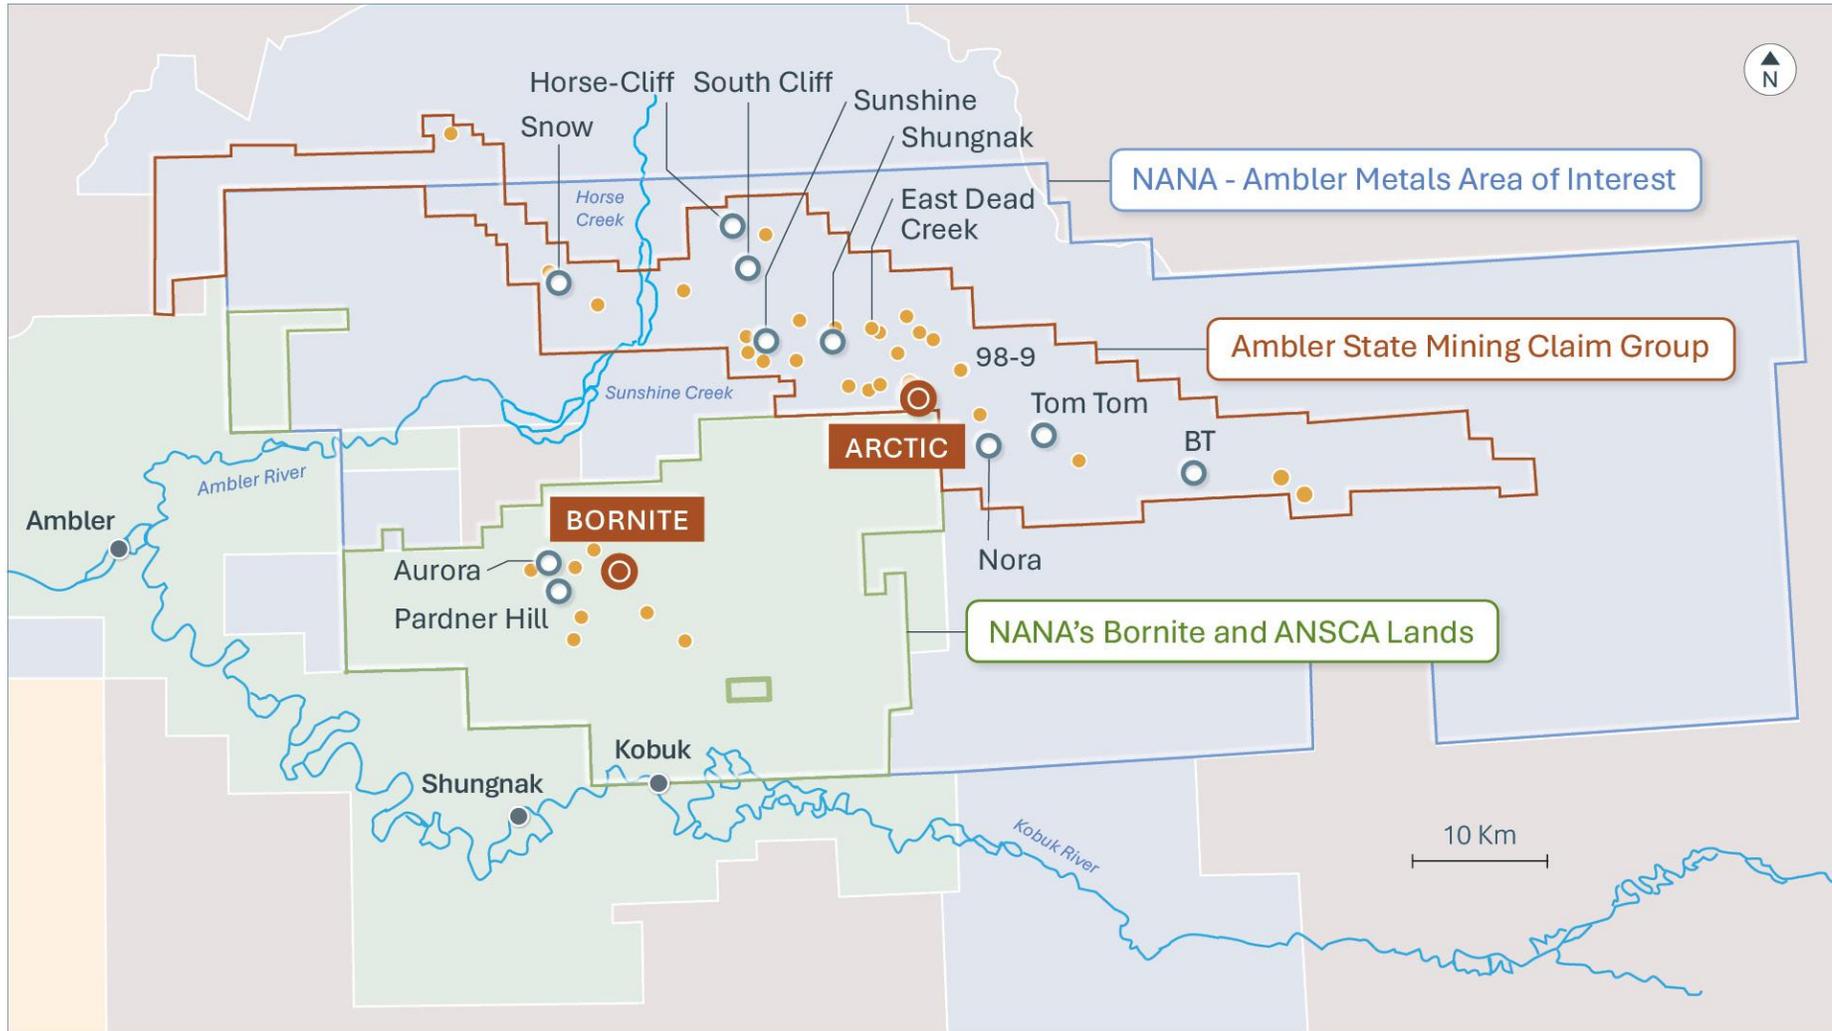

GERMANIUM

Used in semiconductor chips

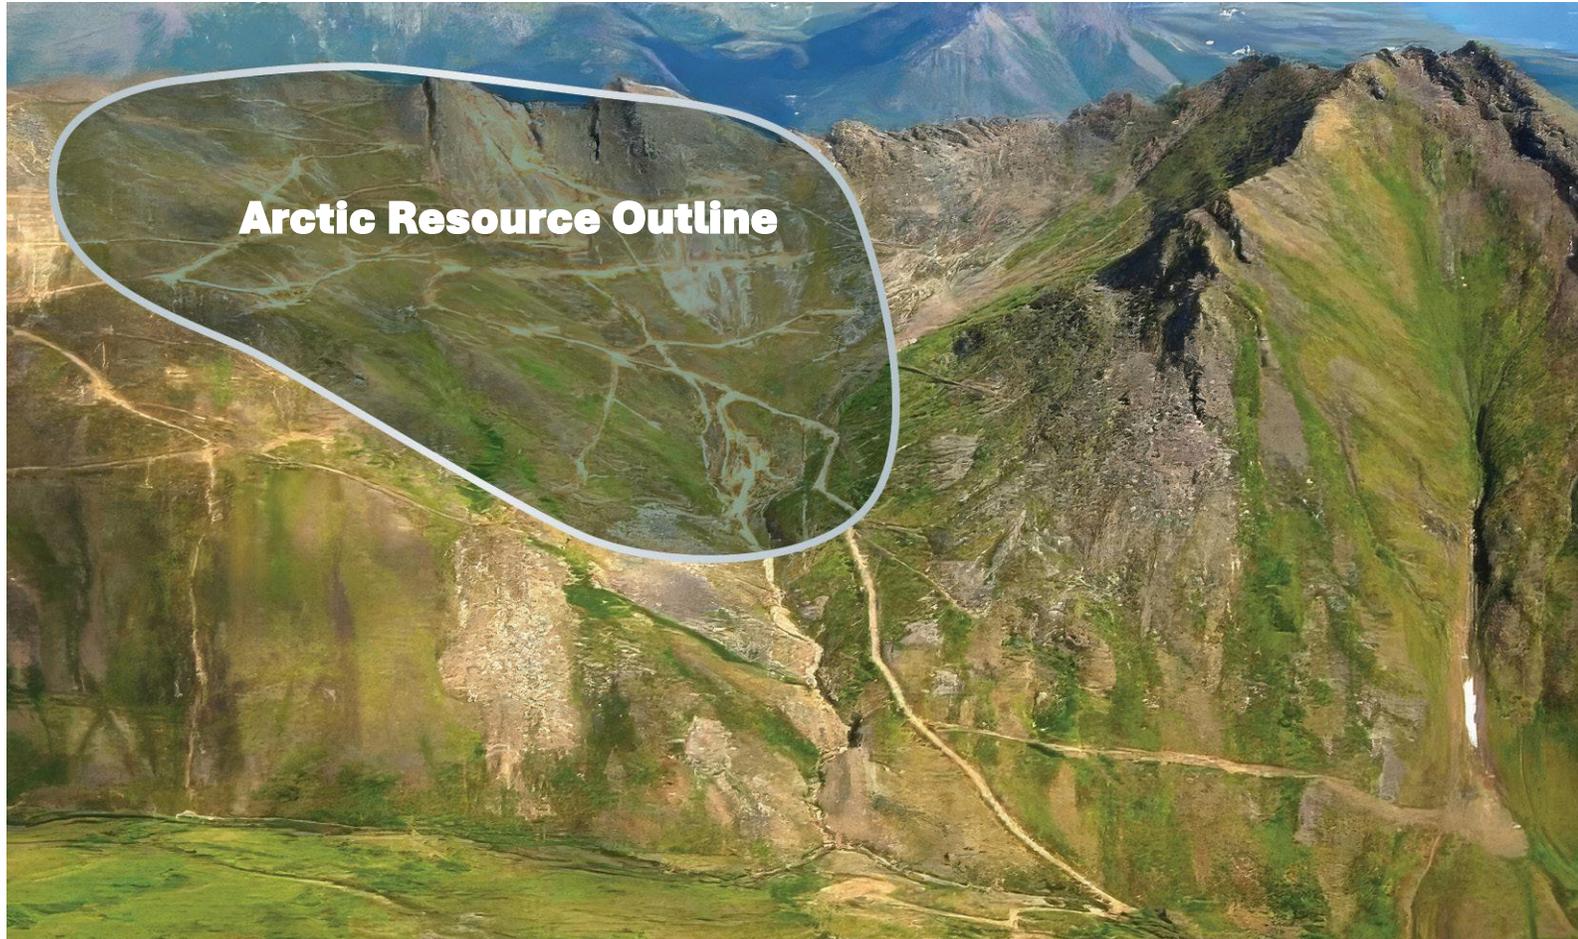

Total Land Package of 190,929 Ha (471,796 Acres)

Au (koz)		675	62
Ag (Moz)		52	5

Arctic Resource Block Model

1. As of November 30, 2024. See the Arctic Report (referenced on Slide 3) and the resource and reserve tables in Appendix for additional information, including details with respect to grade, quantity and metal or mineral content. See also Technical Information and Cautionary Statements on Slide 3.

Notes:

- The Qualified Person for the estimate is Henry Kim, P.Geo., a Wood employee. The estimate is reported using the 2014 CIM Definition Standards.
- Mineral Resources stated are contained within a conceptual pit shell developed using metal prices of \$3.00/lb Cu, \$0.90/lb Pb, \$1.00/lb Zn, \$1,300/oz Au and \$18/oz Ag and metallurgical recoveries of 92% Cu, 77% Pb, 88% Zn, 63% Au and 56% Ag and operating costs of \$3/t mining and \$35/t process and general and administrative costs. The assumed average pit slope angle is 43°.
- The base case cut-off grade is 0.5% copper equivalent: $CuEq = (Cu\% \times 0.92) + (Zn\% \times 0.290) + (Pb\% \times 0.231) + (Au \text{ g/t} \times 0.398) + (Ag \text{ g/t} \times 0.005)$.

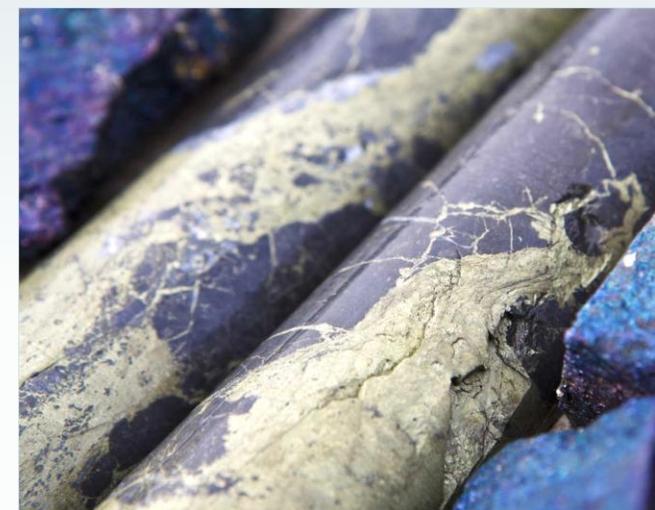

- As a result of flattening the north end of the reserve pit to stabilize the pit wall due to the presence of talc, a portion of the reserve pit extended beyond the resource constraining pit shell. Approximately 568 kt of 1.72% Cu, 0.77% Pb, 0.23 g/t Au and 21.3 g/t Ag in the Indicated category, and approximately 319 kt of 2.01% Cu, 0.87% Pb, 2.53% Zn, 0.50 g/t Au and 37.5 g/t Ag in the Inferred category were added to the Mineral Resource tabulation.
- The Mineral Resource estimate is reported on a 100% basis without adjustments for metallurgical recoveries.
- The Mineral Resource estimate is reported inclusive of those Mineral Resource that were converted to Mineral Reserves.
- Trilogy's attributable interest is 50% of the tonnage and contained metal stated in the table.
- Mineral Resources have been rounded.

Inputs and Economic Results

PRELIMINARY ECONOMIC ASSESSMENT (PEA) INPUTS AND ECONOMIC RESULTS¹	BASE CASE METAL PRICE	SPOT METAL PRICE (February 12, 2026)
Mine Life	17 Years	17 Years
Average Annual Production	109M lbs Cu	109M lbs Cu
Initial Capital Cost (\$ million)	\$503.4	\$503.4

HISTORICAL RESOURCES²

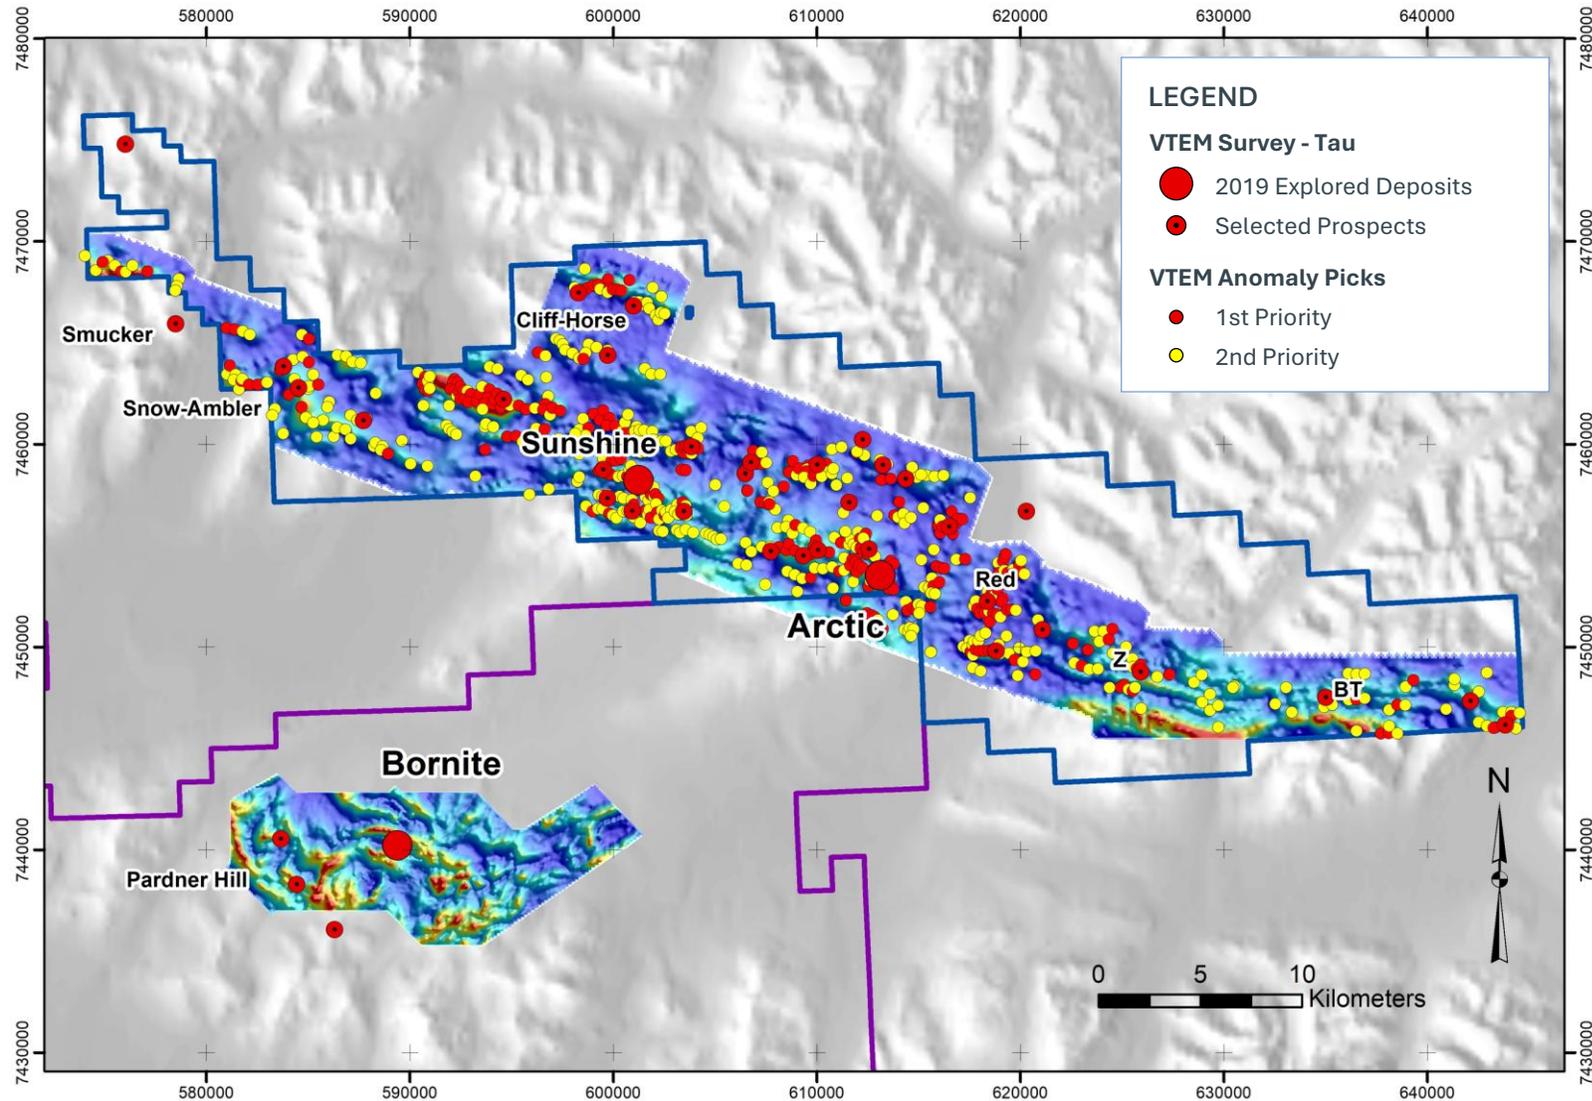

A Qualified Person has not done sufficient work to classify the above historical estimates (Smucker, Horse Creek, Sunshine, Shungnak and BT) as current mineral resources or mineral reserves. Trilogy is not treating these historical estimates as current mineral resources or mineral reserves, has not verified the above historical resource estimates and is not relying on them. Trilogy does not have any ownership interest in Smucker and Sun.

1. See the Arctic Report & Bornite Report (referenced on Slide 3) and the resource and reserve tables in Appendix for additional information, including details with respect to grade, quantity and metal or mineral content. See also Technical Information and Cautionary Statements on Slide 3.
2. The above historical estimates (Smucker, Horse Creek, Sunshine, Shungnak and BT) were prepared prior to the adoption and implementation of National Instrument 43-101 - Standards of Disclosure for Mineral Projects ("NI 43-101") and do not use categories that conform to the current Canadian Institute of Mining, Metallurgy and Petroleum Definition Standards for Mineral Resources and Mineral Reserves. Additional work, including drilling, would need to be carried out on these historical resources to make them

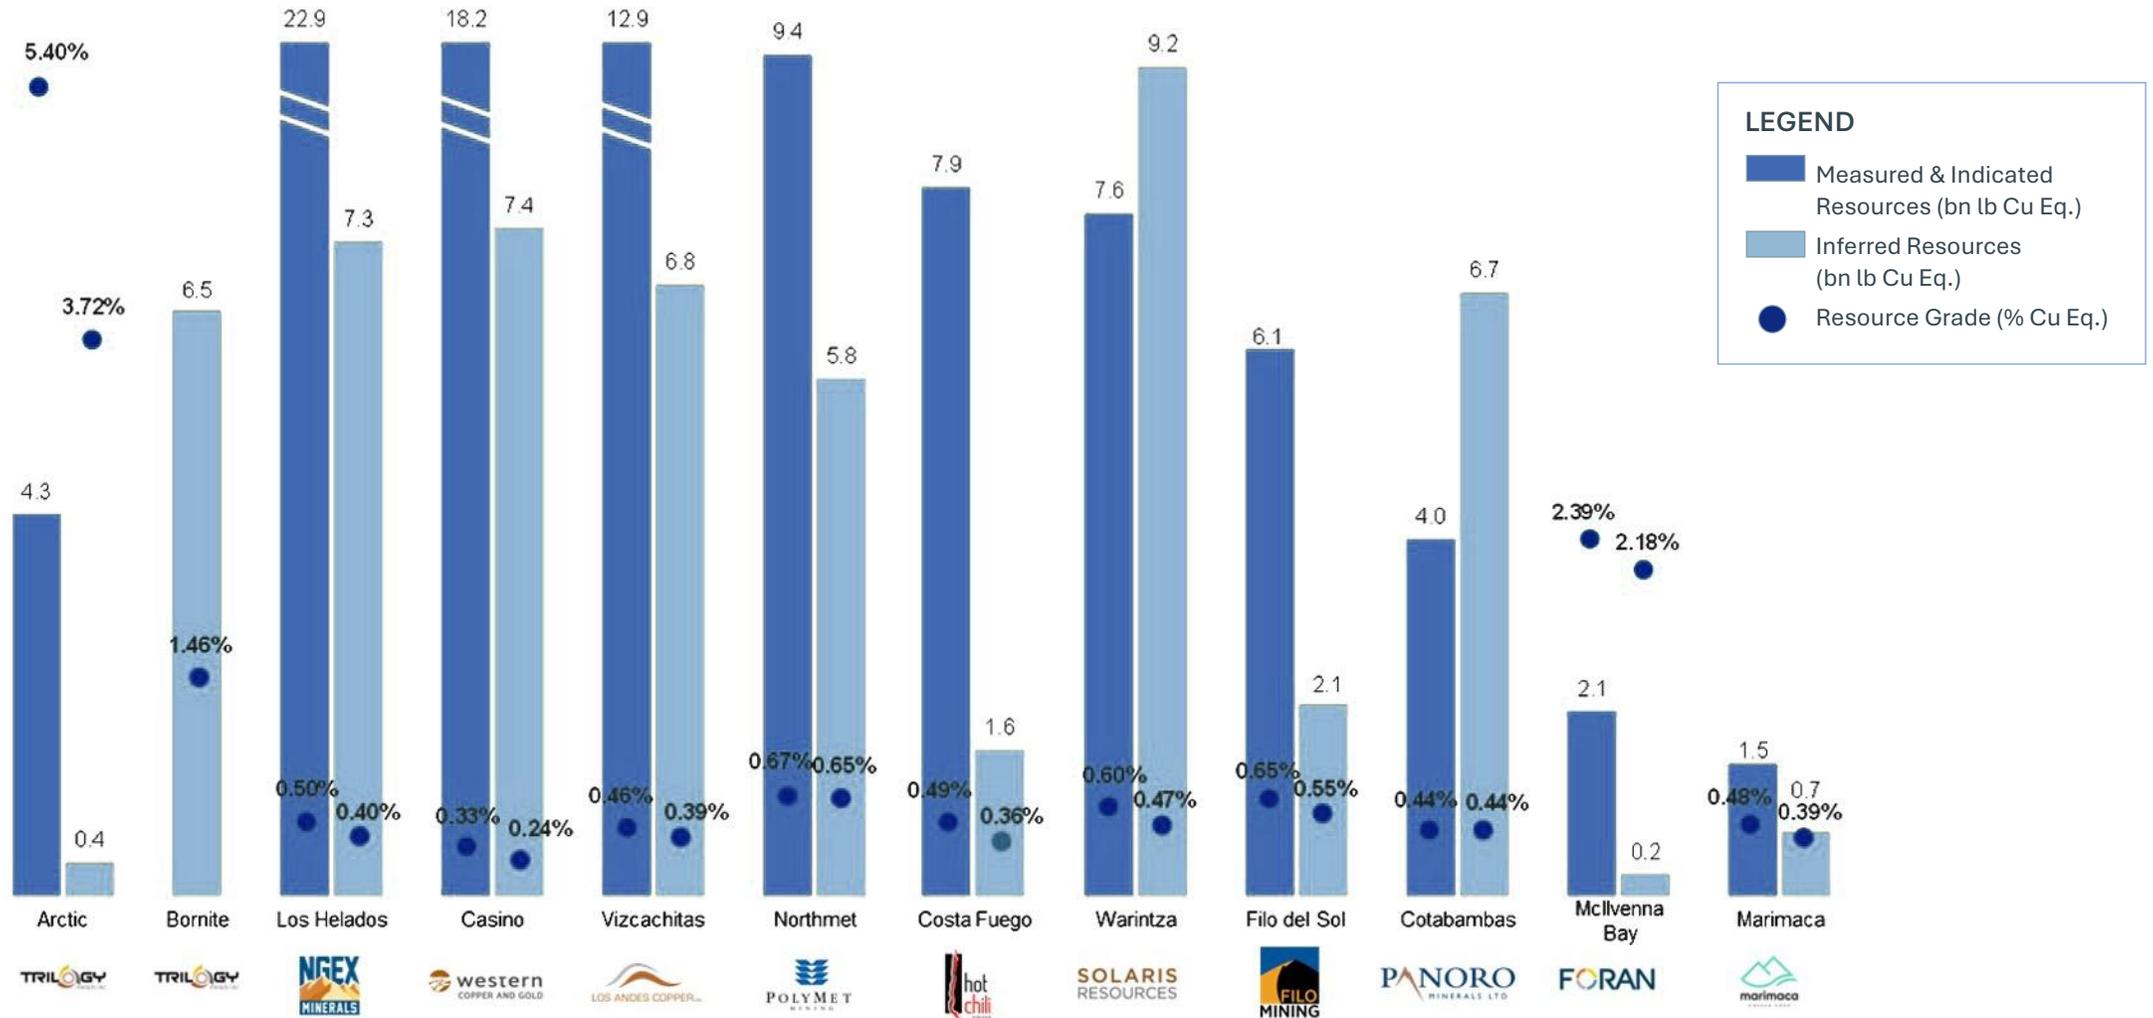

complaint with NI 43-101.

Sources for historical resources: Anaconda Copper Mining Company ("ACM"), ACM Internal Report, 1981; Kennecott Mines Company ("KMC"), KCM Internal Report, 1985; Kennecott Mines Company ("KMC"), KCM Internal Report, 1997; Bear Creek Mining Company ("BCM"), BCM Progress Report, 1983; Kennecott Mines Company ("KMC"), KCM Internal Report, 1997; North of 60 Mining News, September 7, 2018. The Sun project is 100%-owned by Valhalla Metals Inc. Inferred resources have a great amount of uncertainty as to their existence and as to whether they can be mined legally or economically. It cannot be assumed that all or any part of inferred resources will ever be upgraded to a higher category. See "Cautionary Note to United States Investors." in February 6, 2019 press release.

To Advance the Ambler Mining District in Alaska

Joint Venture Partnership with South32

- South32 contributed US\$145 million for its 50% interest in Ambler Metals
- Trilogy contributed the UKMP assets into Ambler Metals

Local Native Partnership with NANA

- Agreement/Business Relationship with strong community relationships

Infrastructure Partnership with State of Alaska

- AIDEA currently advancing road access

President Trump Approves Ambler Access Project

Federal Right-of-Way Permits Issued

Unleashing Alaska's Extraordinary Resource Potential

President Trump issued a decision under Section 1106 of the Alaska National Interest Lands Conservation Act (ANILCA), granting the permits for the Ambler Access Project (or Ambler Road), and overturning the Biden Administration's 2024 rejection of the Ambler Road

It is great to see the reinstatement of permits for Ambler that should have never been revoked in the first place.

Senator Lisa Murkowski

This appeal is **great news for Alaska, for jobs for our workers, for American national security**, for reducing our country's critical mineral dependence on China, and for the incredible Alaskans of the region...I've always said the Ambler Access Project has to be done right, with **close consultation with Alaska Native and community leaders** and **with respect for our environment and subsistence way of life**.

Senator Dan Sullivan

The Ambler Mining District is a strategic asset for Alaska and an important pathway to critical mineral development in the United States. By advancing this access, we are **creating new opportunities for Alaskans while strengthening America's supply chain and reducing dependence on foreign adversaries** for our critical mineral needs.

Representative Nick Begich

Critical Corridors: The Role of the Red Dog Road and the Dalton Highway in Alaska’s Resource Economy

RED DOG ROAD

Part of the Delong Mountain Transportation System (DMTS)

- **Purpose**
Support the development of the Red Dog Mine, one of the world's largest producing zinc mines; transport ore from the mine site to export barges
- **Key Features**
Industrial access, double-lane gravel road
- **Route**
52 miles (83 km) in northwest Alaska from the Red Dog Mine to port facilities on the Chukchi Sea
- **Construction Timeline**
1987-1989
- **Construction Cost**
\$90M for the road construction and \$70M for port infrastructure, totaling \$160M invested by AIDEA in 1987¹ (\$450M in today’s dollars)

DALTON HIGHWAY

Originally known as North Slope Haul Road

- **Purpose**
Support the development of the Trans-Alaska Pipeline and to service the oilfields on Alaska’s North Slope
- **Key Features**
Public (initially industrial access), two-lane mostly-gravel road (partially paved)
- **Route**
414 miles (666 km) across northern Alaska from Livengood (84 miles north of Fairbanks) to Deadhorse and the oilfields of Prudhoe Bay
- **Construction Timeline**
5 months in 1974; expedited by U.S. Government
- **Construction Cost**
~\$125M in 1974² (\$820M in today’s dollars)

Upcoming Progress

**Commencement
of permitting of
Arctic Project**

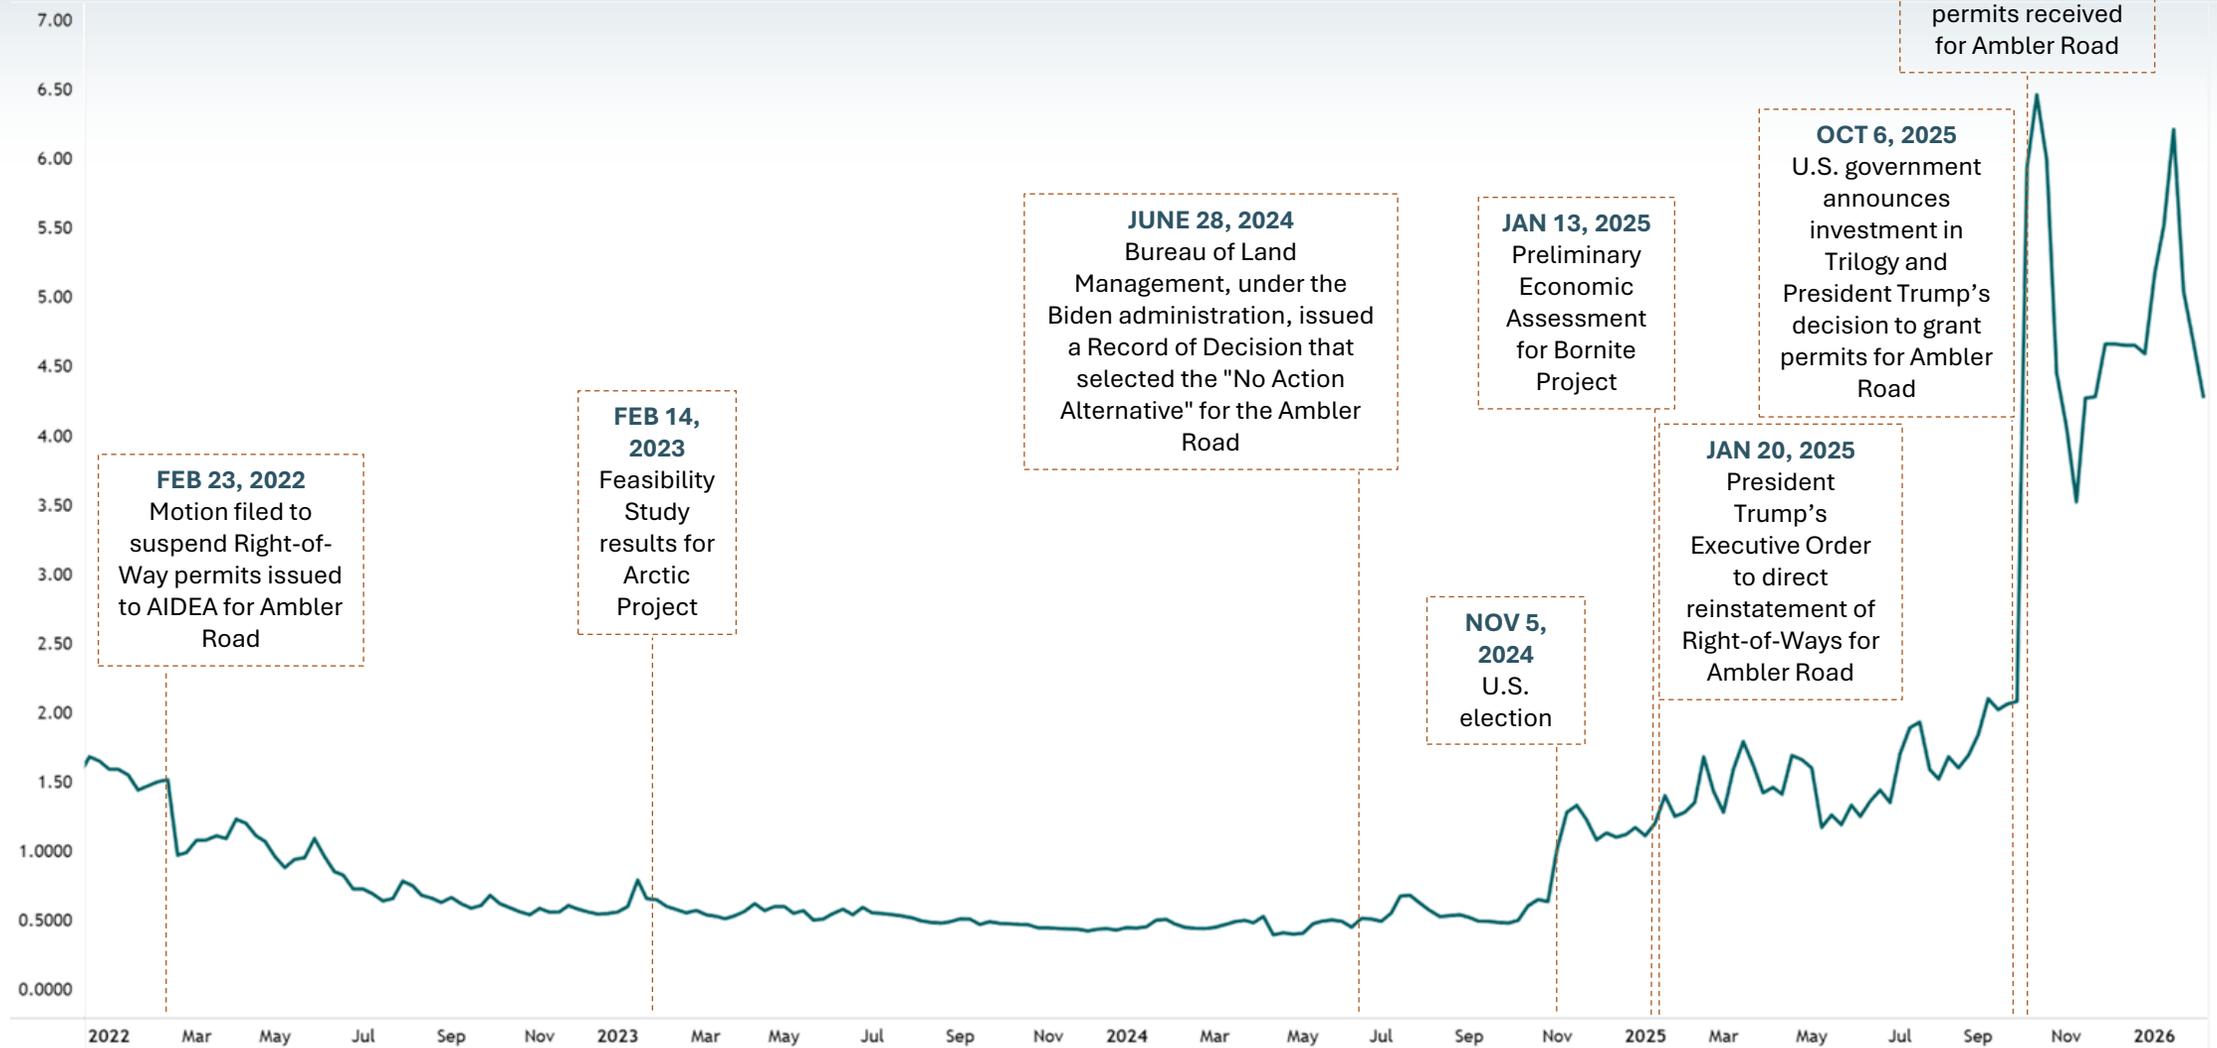

**Exploration
activities at
Arctic and Bornite**

**Progress updates on
Ambler Access Project
(Ambler Road)**

Trilogy Stock Performance on NYSE American

JAN 2022 – FEB 2026

SOLID, SUPPORTIVE SHAREHOLDER BASE

Share Capitalization

NYSE, TSX TMQ ¹	
Issued and Outstanding	172.5 M
Options	9.9 M
Fully Diluted	187.0 M

APPENDIX

Management Team

TONY GIARDINI

PRESIDENT, CEO &
DIRECTOR OF THE BOARD

Experience:

- Kinross Gold
- Placer Dome
- Ivanhoe Mines
- KPMG

Former President of Ivanhoe Mines Ltd. from May 2019 to March 2020. Former Executive Vice President and Chief Financial Officer of Kinross Gold Corporation from December 2012 to April 2019. Former Chief Financial Officer of Ivanhoe Mines Ltd. from May 2006 to April 2012. Spent more than 10 years with Placer Dome Inc. as Vice President and Treasurer. A Chartered Professional Accountant and a Certified Public Accountant and spent 12 years with accounting firm KPMG prior to joining Placer Dome Inc.

ELAINE SANDERS

CFO & CORPORATE
SECRETARY

Experience:

- NovaGold
- Alexco
- Resources
- Resource

More than 25 years of experience in audit, finance, and accounting with public and private companies. Has been involved with numerous financings and acquisitions and has listed companies on both the TSX and NYSE American. Responsible for all aspects of financial reporting, compliance, and corporate governance of Trilogy. Holds a Bachelor of Commerce degree from the University of Alberta and is a Chartered Professional Accountant and a Certified Public Accountant.

RICHARD GOSSE

VP, EXPLORATION

Experience:

- Ivanhoe
- Dundee Precious
- Mines
- Metals

35 years of experience as a geologist, including 15 years at the Vice President level. Former Senior Vice President Exploration at Dundee Precious Metals Inc. overseeing exploration strategy and initiatives to achieve corporate targets to replace mine reserves in Bulgaria and Armenia. Former VP, Exploration at Ivanhoe Mines Ltd. (now Turquoise Hill Resources Ltd.) where he led the exploration efforts at the world-class Oyu Tolgoi copper-gold project in Mongolia. Holds a B.Sc. in Geology at Queens University and a M.Sc. in Mineral Exploration at Imperial College of Science and Technology, London.

Management Team cont'd

OLAV LANGELAAR

VP, CORPORATE
DEVELOPMENT

Experience:

- Dundee Securities ➤ Placer Dome
- Cameco ➤ Gladiator Metals

More than 30 years of experience in Canadian capital markets and international mining, spanning investment banking, corporate development, and operations. Former investment banker with Dundee Goodman Merchant Partners, Primary Capital, and Dundee Securities. Senior management roles with Ospraie Gold, Amerigo Resources, and Placer Dome. Engineer with Cameco, Cominco (now Teck), and Agrium (now Nutrien). Former Vice President, Corporate Development at Gladiator Metals. Holds a Bachelor of Science (Honours) in Mechanical Engineering from the University of Waterloo and a Master of Business Administration from the University of Western Ontario. Member of Engineers and Geoscientists of British Columbia.

MATTHEW KEEVIL

VP, INVESTOR RELATIONS &
BUSINESS DEVELOPMENT

Experience:

- Ivanhoe Mines ➤ ATAC Resources
- Teck Resources ➤ Cross Lake Minerals

More than 20 years of experience in capital markets, investor relations, and corporate affairs across both public and private companies in the global mining sector. Former Director of Investor Relations and Corporate Communications at Ivanhoe Mines from 2020 to 2026. Leadership and analytical roles with ATAC Resources, Teck Resources, and Cross Lake Minerals. Holds a Bachelor of Arts (Honours) in Economics and Political Studies from Queen's University and a Master of Arts in Strategic Communication from Royal Roads University.

Board of Directors

JANICE STAIRS

CHAIR

Experience:

- Namibia Critical Metals
- Endeavour Mining
- Etruscan Resources
- McInnes Cooper

Over 30 years of experience working with companies involved in the resource sector including positions held with Namibia Critical Metals Inc., Endeavour Mining Corporation and Etruscan Resources Inc. Former partner with McInnes Cooper (formerly Patterson Palmer), where she continues to act as counsel to the firm. Practiced law in private practice for 19 years specializing in corporate finance and resource-related issues for private/public companies. Graduated from Dalhousie Law School and holds a Masters of Business Administration from Queen's University.

JIM GOWANS

DIRECTOR

Experience:

- Arizona Mining
- Barrick Gold
- DeBeers
- Placer Dome
- Cominco

Former President, CEO and a director of Arizona Mining Inc. until it was purchased by South32 Limited in August 2018. Former senior advisor to the chair of the board of Barrick Gold Corporation, and served variously as co-president, executive vice president and COO. Former managing director of the Debswana Diamond Company. Held executive positions at DeBeers SA, DeBeers Canada Inc. and PT Inco in Indonesia, and with Placer Dome Ltd. At Cominco Limited, oversaw design, construction and operations at the Red Dog Mine. Holds a Bachelor of Applied Science degree in mineral engineering from the University of British Columbia.

WILLIAM HAYDEN

DIRECTOR

Experience:

- Ivanhoe Mines
- GoviEx Uranium
- Sunward Resources

A geologist with over 39 years of experience in the mineral exploration industry. Co-founder and former President of Ivanhoe Nickel and Platinum (now Ivanhoe Mines Ltd). Worked in a management capacity with several exploration and mining companies both in Australia and overseas. Former President of Ivanhoe Philippines and GoviEx Uranium Inc., and a former director of Sunward Resources Ltd.

WILLIAM HENSLEY**DIRECTOR**

Experience:

- University of Alaska
- Alaska Permanent Fund
- NANA Regional
- Alaska Railroad
- Maniilaq

Former Distinguished Visiting Professor in the Dept. of Business & Public Policy at the University of Alaska. Former Commissioner of Commerce and Economic Development, where he was responsible for Alaska's involvement in tourism and seafood marketing, international trade, insurance, banking and securities, and occupational licensing. Served on the Oil and Gas Policy Council, the Board of Directors of the Alaska Permanent Fund Corporation, the Alaska Railroad and the Alaska Industrial Development Authority. Founded NANA Regional Corporation, and Maniilaq, the regional non-profit representing the tribes in the Kotzebue region.

GREGORY A. LANG**DIRECTOR**

Experience:

- NovaGold Resources
- Barrick Gold

President and Chief Executive Officer of NOVAGOLD RESOURCES INC. Over 35 years of diverse experience in mine operations, project development and evaluations, including experience as President of Barrick Gold of North America. Held operating and project development positions over his 10-year tenure with Barrick Gold Corporation and, prior to that, with Homestake Mining Company and International Corona Corporation, both of which are now part of Barrick Gold Corporation. Holds a Bachelor of Science in Mining Engineering from University of Missouri-Rolla and is a Graduate of the Stanford University Executive Program.

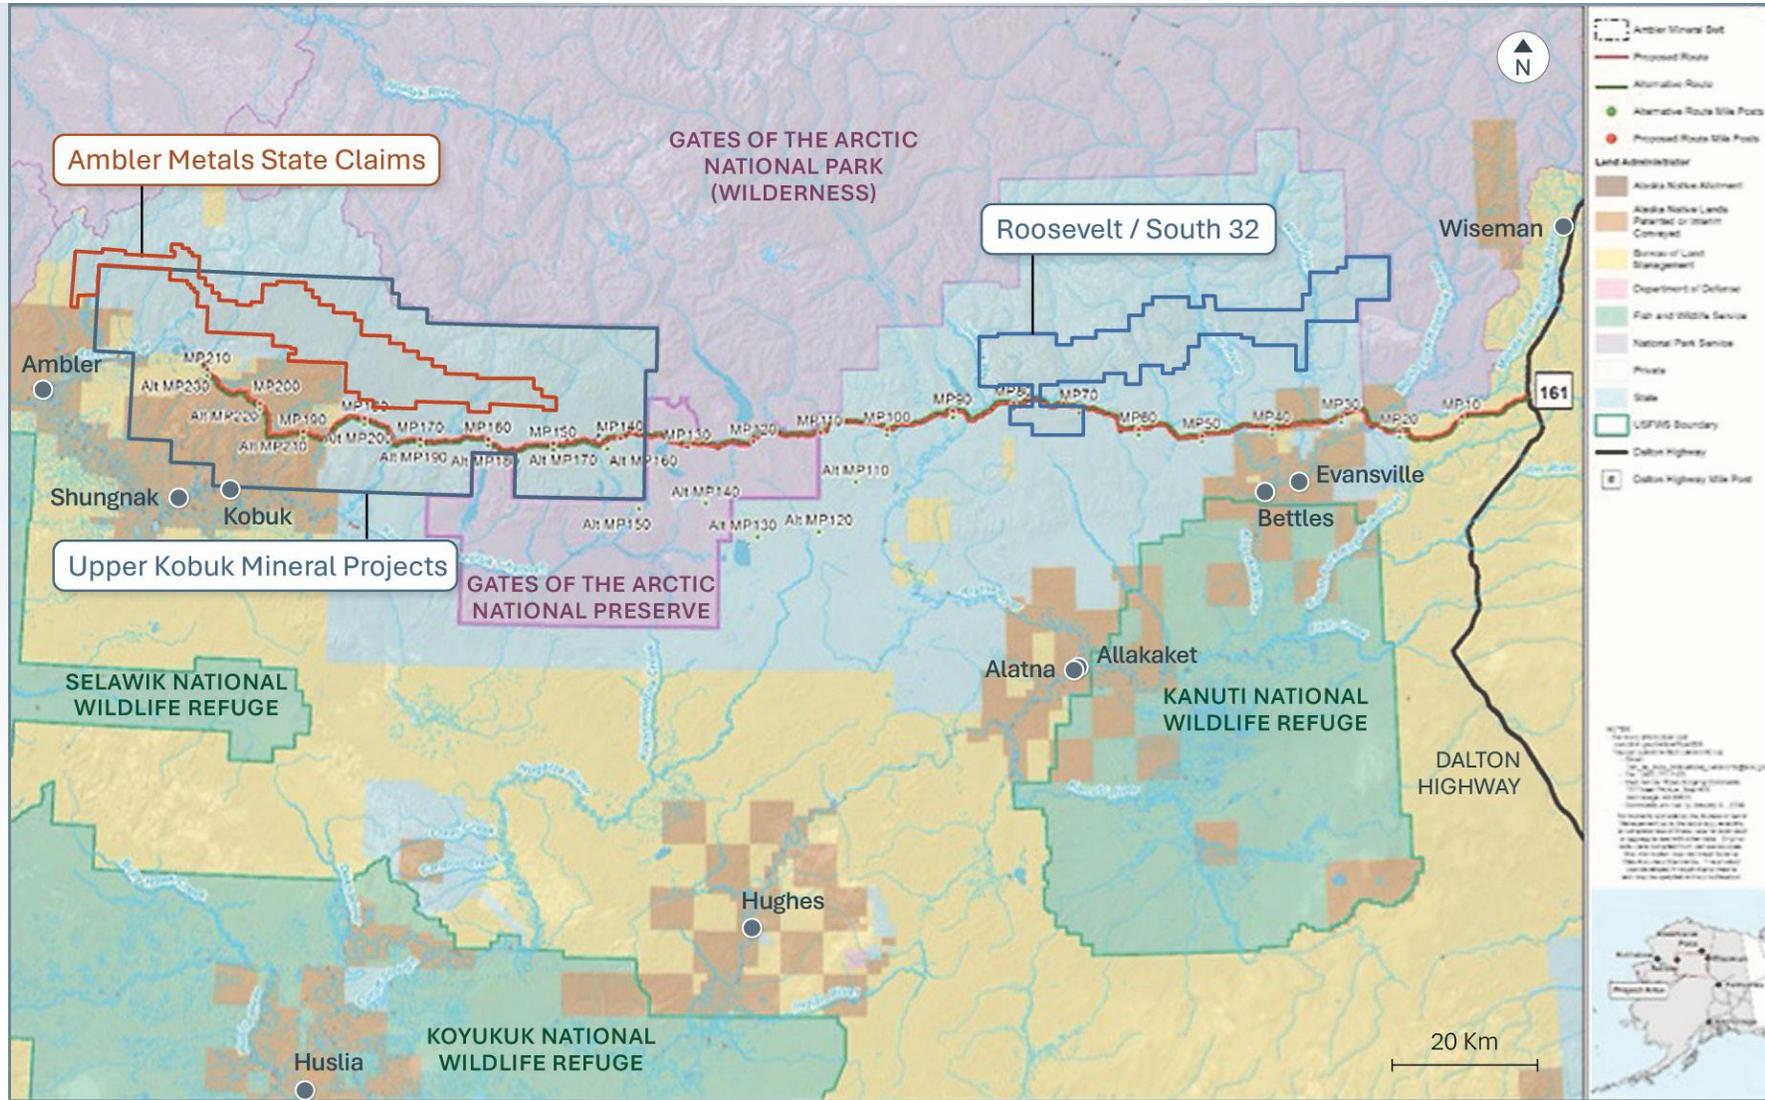

DIANA WALTERS**DIRECTOR**

Experience:

- Amichel LLC
- Liberty Mutual
- Credit Suisse
- Liberty Metals & Mining
- Asset Management
- HSBC
- Eland Capital

Over 35 years of experience in the natural resources sector, as a private equity investor, investment banker, CFO, board member and in other roles within the sector. Owner and sole manager of Amichel LLC, an investment company that also provides advisory services in the field of natural resources. Former President of Liberty Metals & Mining Holdings, LLC, and former member of senior management of Liberty Mutual Asset Management. Former Managing Partner of Eland Capital, LLC, a natural resources advisory firm founded by her, from 2007 to 2010. Extensive investment experience with both debt and equity through various leadership roles at Credit Suisse, HSBC and other firms. Former Chief Financial Officer of Tatham Offshore Inc., an independent oil and gas company with assets in the Gulf of Mexico. Graduated with Honors from the University of Texas at Austin with a B.A. in Plan II Liberal Arts and an M.A. in Energy and Mineral Resources.

Ambler Access Project

Mineral Resource Summary

(As of November 30, 2024, Under Regulation S-K 1300)

RESOURCE CATEGORY	TONNAGE (Mt)	AVERAGE GRADE					CONTAINED METAL CONTENT				
		Cu (%)	Pb (%)	Zn (%)	Au (g/t)	Ag (g/t)	Cu (Mlb)	Pb (Mlb)	Zn (Mlb)	Au (koz)	Ag (Moz)
ARCTIC – 50% ATTRIBUTABLE INTEREST											
Inferred	2.25	1.92	0.70	2.93	0.43	35.60	94.50	34.50	144	31	2.50
BORNITE – 50% ATTRIBUTABLE INTEREST											
Inferred	104.50	1.42	–	–	–	–	3,264	–	–	–	–

NOTES:

1. Mineral Resources are current as of November 30, 2024 for Arctic and Bornite and were verified by a Qualified Person employed by Wood.
2. Mineral Resources were prepared in accordance with the standards and definitions of S-K 1300.
3. The Mineral Resource estimate is reported exclusive of those Mineral Resources that were converted to Mineral Reserves.
4. Trilogy Metals' 50% attributable interest is stated in the table.
5. Figures may not sum due to rounding.
6. The Mineral Resources are reported in place (point of reference).

ARCTIC NOTES:

1. Mineral Resources stated are contained within a conceptual pit shell developed using metal prices of \$3.00/lb Cu, \$0.90/lb Pb, \$1.00/lb Zn, \$1,300/oz Au and \$18/oz Ag and metallurgical recoveries of 92% Cu, 77% Pb, 88% Zn, 63% Au and 56% Ag and operating costs of \$3/t mining and \$35/t process and general and administrative costs. The assumed average pit slope angle is 43°. The commodity pricing used a combination of two year trailing actual metal prices, and market research and bank analyst forward price projections, prepared in June 2020.

2. As a result of flattening the north end of the reserve pit to stabilize the pit wall due to the presence of talc, a portion of the reserve pit extended beyond the resource constraining pit shell and a second pass of Mineral Resource tabulation was performed exterior to the constraining resource pit and interior to the constraining reserve pit which is included in the Mineral Resource tabulation.
3. The cut-off grade is 0.5% copper equivalent: $CuEq = (Cu\% \times 0.92) + (Zn\% \times 0.290) + (Pb\% \times 0.231) + (Au\ g/t \times 0.398) + (Ag\ g/t \times 0.005)$.

BORNITE NOTES:

1. Mineral Resources are constrained by an open pit shell at a cut-off grade of 0.50% Cu, with an average pit slope of 43 degrees; and underground mining shapes assuming cut-and-fill mining method based on a 1.79% Cu grade shell for Ruby Zone and an optimized underground mineable stope shape assuming sublevel stoping mine method based on a break-even cut-off grade of 1.45% for South Reef. The cut-off grades assume a \$4.60/lb Cu price, process recovery of 90.47%, process cost of \$21.00/t processed, treatment, refining, sales cost of \$0.78/lb Cu in concentrate, road use cost of \$8.04/t processed, and 2% NSR royalty. For the open pit, costs include mining costs of \$3.34/t mined and G&A cost of \$4.30/t processed. For mining at South Reef, costs include mining costs of \$65.00/t mined and G&A cost of \$14.50/t processed. For mining at Ruby Zone, costs include mining costs of \$90.00/t mined and G&A cost of \$14.50/t processed. The long-term metal price forecast used a combination of information derived from 22 financial institutions, from pricing used in technical reports filed with Canadian regulatory authorities over the previous 12-month period from the effective date of the Mineral Resource estimate, from pricing reported by major mining companies in public filings such as annual reports, historical average pricing.

Mineral Reserve Estimate

(As of November 30, 2024, Under Regulation S-K 1300)

CLASSIFICATION	TONNAGE (Mt)	AVERAGE GRADE				
		Cu (%)	Pb (%)	Zn (%)	Au (g/t)	Ag (g/t)
ARCTIC – 50% ATTRIBUTABLE INTEREST						
Probable Mineral Reserves	23.35	2.11	0.56	2.90	0.42	31.80

NOTES:

- Mineral Reserves estimates are current as of November 30, 2024 and were renewed by a Qualified Person employed by Wood.
- Mineral Reserves were estimated assuming open pit mining methods and include a combination of internal and contact dilution. Total dilution is expected to be between 30% and 40%. Pit slopes vary by sector and range from 26° to 56°. A marginal NSR cut-off of \$38.8 /t is used. The long-term metal price forecast used a combination of information derived from 22 financial institutions, from pricing used in technical reports filed with Canadian regulatory authorities over the previous 12-month period prior to the publication of the S-K 1300 Arctic report, from pricing reported by major mining companies in public filings such as annual reports in the previous 12-month period prior to the publication of the S-K 1300 Arctic report, spot pricing, and three-year trailing average pricing.
- Mineral Reserves are based on prices of \$3.46/lb Cu, \$0.91/lb Pb, \$1.12/lb Zn, \$1,615/oz Au, and \$21.17/oz Ag.
- Variable process recoveries averaging 92% Cu in Cu concentrate, 62% Pb in Pb concentrate, 88% Zn in Zn concentrate, 47% Au in Cu concentrate, 33% Ag in Cu concentrate, 26% Au in Pb concentrate and 49% Ag in Pb concentrate.
- Mineral Reserves are based on mining cost of \$2.52/t incremented at \$0.02/t/5m and \$0.012/t/5m below and above 790 m elevation, respectively.
- Costs applied to processed material following: process operating cost of \$18.31/t, G&A of \$5.83/t, sustaining capital cost of \$2.37/t, closure cost of \$4.27/t, road toll cost of \$8.04/t.
- Strip ratio (waste:ore) is 7.3:1.
- Selling terms following: payables of 96.5% of Cu, 95% of Pb and 85% of Zn, treatment costs of \$80/t Cu concentrate, \$160/t Pb concentrate and \$215/t Zn concentrate; refining costs of \$0.08/lb Cu in Cu concentrate, and \$10/oz Au, \$1.25/oz Ag in Pb concentrate; and transport cost \$270.98/t concentrate.
- Fixed royalty percentage of 1% NSR.
- Trilogy Metals' 50% attributable interest is stated in the table.
- The point of reference for the Mineral Reserves is defined at the point where the ore is delivered to the processing plant.
- The metal prices and costs were fixed over the 13-year mine life.
